PROFESSIONAL SUMMARY

Computer Science undergraduate focused on backend engineering and AI systems. Experienced in designing microservice architectures, GraphQL APIs, Retrieval-Augmented Generation (RAG) pipelines, Dockerized deployments, and scalable web applications with strong foundations in Data Structures, Operating Systems, DBMS, and Computer Networks.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript

Backend: Node.js, Express.js, Django REST Framework, Spring Boot, GraphQL, REST APIs

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap

Databases: MongoDB, MySQL, Redis, ChromaDB

AI/LLM: RAG, Ollama, Embeddings, Vector Search

Tools: Docker, Git, GitHub, AWS S3/EC2, Linux, Postman

Core CS: DSA, DBMS, OOP, Operating Systems, Computer Networks

PROJECTS

QuestHub | *Microservices Social Platform*

GitHub

- Designed a distributed social platform consisting of five independent services: Next.js frontend, Express API Gateway, Django Authentication, Apollo GraphQL Post Service, and WebSocket Messaging Service.
- Implemented JWT authentication, role-based authorization, Redis-backed rate limiting, AWS S3 media storage, centralized API routing, and Docker Compose deployment.
- Integrated GraphQL for posts, comments, likes, follows, and REST services for authentication and messaging.
- Verified production builds across all services, resolved critical bugs, eliminated production vulnerabilities, and improved maintainability through modular service separation.

RAG Prototype | *Local Retrieval-Augmented Generation*

GitHub

- Built an end-to-end local RAG pipeline using ChromaDB, Ollama, bge-m3 embeddings, and qwen2.5:7b for document question answering.
- Implemented adaptive chunking (400/1000 characters), SHA-256 document deduplication, semantic indexing, and top-6 similarity retrieval.
- Achieved ingestion throughput of approximately 15–20 chunks/second with end-to-end query latency of 3.5–9 seconds on local hardware.
- Designed configurable ingestion and retrieval pipelines supporting PDFs, multilingual embeddings, and scalable semantic search workflows.

Portfolio Website

Live | GitHub

- Developed a responsive portfolio using Next.js and Tailwind CSS with reusable UI components and modular architecture.
- Configured automated deployment on Vercel with GitHub integration and optimized static generation for fast page loads.

EDUCATION

PES University

Bengaluru, India

B.Tech in Computer Science and Engineering (Lateral Entry)

2025–2028

Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming
